

VINAY KUMAR

AI & ML Engineer | Full Stack Developer

Delhi, India | vk8964210@gmail.com | +91 9891648446 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Aspiring AI & Machine Learning Engineer specializing in applied ML, generative AI, and full-stack product development. Experienced in building and shipping end-to-end AI-powered applications — from model integration to production deployment — across web and mobile platforms. Currently deepening expertise in Python, C++, and Data Structures & Algorithms while working on real-world ML and automation projects.

TECHNICAL SKILLS

Languages & Core: Python, C++, TypeScript, Data Structures & Algorithms

AI / ML & Generative AI: Deep Learning, Machine Learning (Python), Google Gemini API, Generative AI model integration, AI-driven automation & workflow design

Web & Full Stack: React, Next.js, FastAPI, TypeScript

Mobile: Android Studio, Jetpack

Cloud, Design & Automation: Firebase, Vercel, Anaconda, Figma, Canva, n8n, Relay.app, Make

PROJECTS

InterviewAI — AI-Powered Interview Preparation Platform

Next.js, TypeScript, Google Gemini API

- Built a platform that generates hyper-relevant, role- and company-specific interview questions using the Gemini API, tailored to a candidate's experience and target role.
- Implemented AI-generated model answers and structured practice guidance to help users prepare more effectively and identify weak areas.
- Designed the front end in Next.js and TypeScript for a responsive, low-latency practice experience.

AI Resume Screening System

Automation, Relay.app, Google Gemini API

- Built an automated pipeline that accepts a PDF resume upload and returns an AI-generated analysis, including a skill-gap report against target roles.
- Used Relay.app and the Gemini API to orchestrate the end-to-end automation without manual intervention, from file intake to report generation.

Friendly — AI Mental Wellness Companion

TypeScript, Firebase, Machine Learning (Python)

- Developed a privacy-first, AI-powered wellness companion that helps detect early signs of stress and burnout for students, offering 24/7 AI-driven support.
- Built with a Python ML component for stress-pattern detection, TypeScript front end, and Firebase backend; designed to keep all user data private and secure.
- Supported 10,000+ students, with a focus on fully private, on-demand emotional wellness support.

Postify — Positivity-Focused Social Platform

Jetpack Compose, Android Studio, Firebase

- Built a native Android social app centered on judgment-free, positive self-expression, differentiated from mainstream social platforms by design.
- Used Jetpack Compose for a modern declarative UI and Firebase for real-time backend data and authentication.

WORK EXPERIENCE

Machine Learning Engineering Intern — @FlyRank Corp.

- Built, trained, and fine-tuned predictive machine learning models for real business use cases.
- Optimized model performance through hyperparameter tuning and iterative evaluation before deployment.
- Applied data wrangling and feature engineering techniques to improve model input quality and reliability.

AI Automation & Intelligent Solutions Intern — @IBM | AICTE | BharatCares

- Designed and deployed AI-driven workflows to automate routine, repetitive tasks, reducing manual effort.
- Built and integrated intelligent automation solutions using modern AI frameworks and tools.
- Collaborated with a team on real-world problem statements provided by BharatCares, delivering practical AI solutions.

Logistics Manager — @Impact HealthCare

May 2023 – April 2024

- Managed logistics operations, delivery scheduling, and inventory tracking; developed leadership and cross-team coordination skills.

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning — University School of Automation & Robotics, GGSIPU, Delhi

Aug 2024 – 2028

- Specializing in AI and Machine Learning with a strong foundation in C++, Data Structures & Algorithms, and Automation.
- Active member of college technology societies and development clubs.

CERTIFICATIONS & BADGES

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle
- AI Automation & Cloud Computing Verification — IBM
- Fundamentals of Generative AI Models — Google
- GenAI-Powered Data Analytics — Tata
- IoT & Digital Transformation Verification — Cisco / Nasscom
